TARGET CALL

SecureAI

HORIZON-CL3-2026-02-CS-ECCC-02

€21.2M | Innovation Action | Sep 2026

When you model human behaviour, security becomes personal.

Our AI-first compliance solution captures how people actually behave — but behavioural data is deeply sensitive. The AI systems that process it need to be robust, private, and trustworthy by design. Askara bridges cybersecurity culture and AI safety for SMEs navigating NIS2 and ISO 27001.

OUR CONSORTIUM (under construction) – JOIN US

Turku University of Applied Sciences

Finland — Cyber & Hybrid Resilience research, AI safety, Cyber Test Lab

Tet

Latvia — Cybersecurity infrastructure, MSSP, data centre security

Open to additional partners

Research · SME pilots · Policy stakeholders — get in touch

WHAT WE BRING TO THE CONSORTIUM

AI compliance agent platform

Evidence generation as a byproduct of real behaviour

EU-wide SME pilot network

Beta programme launching summer 2026

Human factors methodology

Cybersecurity culture change research for SMEs
